

```
#include <stdio.h>

int main() {
    float balance, withdraw;

    // Ask the user for the starting balance
    printf("Enter your account balance: ");
    scanf("%f", &balance);

    // Continue withdrawing while balance is greater than
0
    while (balance > 0) {
        printf("Enter amount to withdraw: ");
        scanf("%f", &withdraw);

        balance = balance - withdraw; // Update balance
        printf("Remaining balance: %.2f\n", balance);

        if (balance <= 0) {
            printf("Insufficient funds! Your account is
empty.\n");
        }
    }

    return 0;
}
```
