

```
#include <stdio.h>

int main() {
    float attendance, average;

    // Input from the user
    printf("Enter attendance percentage: ");
    scanf("%f", &attendance);

    printf("Enter average marks: ");
    scanf("%f", &average);

    // Check eligibility
    if (attendance >= 75 && average >= 40) {
        printf("Eligible for final exams.\n");
    } else {
        printf("Not eligible.\n");
    }

    return 0;
}
```
